#### DAVIS THEATRE.

Last Chance to See the Big Spectacular Feature, Fire and Sword, Today.

Notwithstanding the very hot weather, the crowds are still filling this weather, the crowds are still limit this popular theatre at every performance, and the reason is not hard to determine, as it is always cool and comfortable in here, no matter how hot it is in the street. The Davis has a system of cooling that is equal to any in the street and patrons have not to the state, and patrons have not to listen to the disturbing noises of elec-tric fans, and there are no draughts or tric fans, and there are no draughts or inconveniences to annoy. The steady influx of pure cold air while the show is going on keeps the temperature cool all the time. The special feature that has caused so much favorable comment the first half of this week, Fire and Sword, will be seen for the last time today, and for a real spectacular thriller this picture is without an equal. The story is an appealing one and the burning of a whole city teams the nerves tingling and holds the one and the burning of a whole city keeps the nerves tingling and holds the interest throughout the whole five res.s of the production. It took over a thousand people and an army of U. S. marines to make this wonderful feature. There is the usual high clus programme of Mutual Movies with include the famous Mutual We sly, and Mabel's Married Life, a Keystone comedy that is just one laugh after comedy that is just one laugh after another, with dainty Mabel Normand and funny Charile Chaplin, the two greatest funmakers on the screen. Mr. Boyle is showing his versatility this greatest funnakers on the screen. Mr. Boyle is showing his versatility this week in a whistling number that brings the applause every time he goes on. Mr. Boyle is one of the few whistlers who can whistle two distinct tones at one time, without the aid of his fingers or any mechanical device. He also sings a beintiful Irish Iullaby that is something worth hearing. For that is something worth hearing. For the last half of the week the feature is Malcolm Williams, the eminent dramatic actor, in The Brute, a powerful drama of the conflict of the sexes. Don't miss it. Baragin matinee daily at 2.30; 5 and 10 cents.

#### COLONIAL THEATRE.

#### The Three Scratch Clue, Detective, Featuring Francis Bushman.

One of the most exciting pictures of the season is the one at the Colonial theatre today and entitled The Three Scratch Clue, a strenuous detective story featuring popular Francis Bush-man. He is in love with the daugh-ter of Dr. Strong, a wealthy lover of antique books. He possesses one val-ued at \$50,000, and a gentleman crook named Lynch pretends to love the named Lynch pretends to love the daughter in order to gain possession of the priceless treasure. Norman, in love with the daughter, detects the attempt to steal the book, and in a terrific chase by auto, in which the two strugwhich the machine runs wild, the door bursts open and the two men thrown to the bottom of a steep cliff, the vil-lain is captured. Policemen attracted by the explosion of the runaway auto come to the assistance of the plucky lover of the girl and regain the book A Million for Defense. The Cop on the Beat, and other fine films complete to-day's splendid programme.

## The Dust Problem.

Modern cities are dust producers. Streets and pavements and sidewalks are worn by the friction of the traffic, car wheels are ground to metallic dust, fabrics turn to lint, fuel burns with products of smoke and ashes, Dust is being continually produced both within and without our houses. Recent studies in several have shown that the numbers of dust particles in the air above sidewalks range from one hundred thousand to a millon per cubic foot. At higher levels the numcubic foot. At higher levels the numbers are less. At the Woolworth building, in New York, the highest building in the world (716 feet), the air at the street level on July 2, 1913, contained 221,000 dust particles per cubic foot; at the tenth story, 85,000; at the thirtieth story, 70,000, and at the fifty-seventh story, 27,000. As a figure of comparison, the air over Long Island Sound at a point several miles from shore was found to contain 18,000 dust particles per cubic foot. Dusty air partieles per cubic foot. Dusty air contains bacteria, but the numbers are fewer than those of the dust particles. At the John Hamook Building, in Bos-ton, es June 5, 1913, the air near the

New Discovery for Flesh and Weight Increase Meets Big Demand.

Binghamton, N. Y., July 11.—That the recent discovery of Sargol compound for building flesh onto thin, weak men or women is a wonderful success was shown when the Sargol Company in this city proved by its records that one million or more people have used Sargol since it was introduced in America. The discovery of Sargol, it will be remembered created much surprise in the medical world a short time ago, when it was awarded the grand prize of a gold medal and diploma of honor at the Brussells Exposition, after scientists despaired of finding a true flesh builder.

Of even greater importance to people who have been considering sanitariums or health resorts is today's statement by the Sargol Company's manager, who announced that the great compound will soon be within reach of the people at drug stores throughout the country, while before it could only be obtained by personal correspondence with the home offices in this city.

Sargol is the product of expert specialists on diet who realized that no amount of good wholesome toods or physical exercises could produce fat on a thin, rundown body until the digestive apparatus was corrected to assimilate food properly. These specialists found that a peculiar combination of six great strengthening, fat-making elements now known as Sargol would supply the digestive organs with the real elements needed to change food into the nourishing, fat-laden blood which rebuilds the exhausted cells and fat ilissues, and increases weight in a natural way.

fat lissues, and increases weight in a natural way.

A visit to the company's offices here shows hundreds of letters, received from people whose weight has been increased with 10 to even 50 pounds of solid, healthy flesh. Many letters also tell of how the compound filled out extremely thin parts or limbs of the body and was of general benefit to nervous stomach trouble.
